# Appearance

The first version of the website was created with a bit of humor and added some funny comments about the attractions, and it resulted so fun, that it was decided that the creepy themed comments would be a keeper. It was also decided to keep the comments as is and give it a dark turn into a HALLOWEEN themed website.
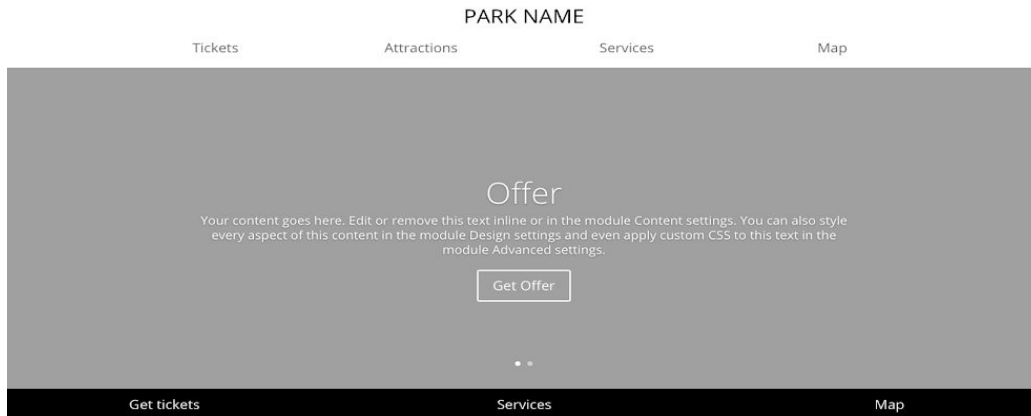

So, in short:
- Black-Orange color pallete
- Creepster google font was imported and applied
- CSS applied with minor relocation of blocks of text and images, but overall, faithful to the first wireframe design
